Fukuoka Prefecture's Educational Approach to Promote "One Health" Education

Osamu Kaida

Assistant Director, Physical Education, Sports and Health Division, Education Promotion Department, Education Bureau, Fukuoka Prefecture

On January 5, 2021, the Fukuoka Prefectural Government Basic Ordinance for Promotion of One Health was enacted as the first of its kind in Japan. The ordinance stipulates the promotion of education for children and students to encourage understanding of One Health.

Thus, the One Health Education Promotion Project for Fukuoka Prefecture is hereby introduced. This project is based on the philosophy of One Health which states that the health of humans, animals, and the environment are closely connected, or in other words, it declares that "health is one."
